

Pepha®-Tight

Pepha®-Tight is a highly purified biotechnologically produced extract from the microalgae *Nannochloropsis oculata* combined with a well balanced fraction of polysaccharides. It functions as a skin tightener which provides immediate tightening to the skin. It has been shown to protect human fibroblasts from oxidative stress, simultaneously increasing the formation of collagen-I thereby promoting a long term tightening effect through the strengthening of the skin's connective tissue.

Pepha®-Tight can be used for all skin tightening applications including lifting products, masks, decollete treatments, gels and serums.

Usage Rate: 1 - 5%

Appearance: Yellow to amber, opalescent to turbid, highly viscous liquid

pH: 5.1

Solubility: Soluble in water.

Storage: Clean location, protected from light, temperature between 35° - 46°F (2°-8°C)

INCI: Algae Extract (and) Pullulan

Caution: Do not directly apply onto your skin.

This product should be added to a formulation at the recommended usage rate.
